To,

As per List

Sub: Advisory to ensure One Nation, One License for Electrical Contractors” - regarding.

In view of representations received from various organizations/contractors it has been felt that there is a need of having “One Nation, One License” for electrical contractors so that under the ease of doing business they can take up the works in various States by having a valid license in any of the States/Union Territories. This will avoid long drawn process of obtaining the separate license in the respective States, where they intend to work.

It is also informed that, a meeting in this regard was also taken by Chief Engineer, CEA on 29.09.2023 with all the State Electrical Inspectorates in which most of the States welcomed the step of One Nation, One License. It was discussed in the meeting that Supervisor License holder and wiremen license holder of different States are allowed to work in other states by different arrangements made by different States (like reciprocal MoUs/ verification/ endorsement etc.) however, no such procedure is allowed for Electrical Contractor license holder of other States. As such, all State Electrical Inspectorates in which there is no such procedure existing to allow Electrical Contractor of other States are advised to take necessary measures as mentioned below:

1. **Endorsement/verification of outside contractor licenses issued by other State Licensing Board:** In order to facilitate the Electrical Contractor who possesses an Electrical Contractor License granted by one State to take up work in another State, it is hereby advised to allow the same by way of endorsement/verification subject to the fulfilment of the following conditions:

- a) Needs verification of authenticity of:
 - i. license of the contractor,
 - ii. workman permit of workman
 - iii. “Supervisor competency certificate” of supervisor working under the contractor.

The contractor is to make an undertaking that the supervisor and the workmen possess the required qualifications. The competency certificate of the workmen/supervisor should be self-certified/ self-attested.

File No.CEA-PS-16/25/2023-CEI Division

- b) Adjustment of appropriate category of Electrical Contractor according to the respective State/UTs regulation.
 - c) The respective State Government/UT Administration where the work is to be undertaken by the Electrical Contractor to get the verification of the license by the issuing State in not more than 15 days.
2. **Territorial Restrictions:** In addition to these, it is advised that while granting licenses to Electrical Contractor no State shall put territorial restrictions for undertaking works in their State only.
3. **Revoking of License:** In case of misconduct by any Electrical Contractor license holder of other States, an inquiry is advised to be conducted by a subcommittee led by the officer of the level of Superintending Engineer (to be nominated by the appropriate Government) of State in which presently working. The findings of this subcommittee are then presented to the Licensing Board of State in which presently working. The decision of the Licensing Board will be conclusive and obligatory.

It issues with the approval of competent Authority.

Yours faithfully,

for  20/11/2023
(Rishika Sharan)

Chief Engineer, Chief Electrical Inspectorate
